

POSITION

HOMOLOGATION ENGINEER

MINIMUM EXPERIENCE

5 years

OCCUPATION TYPE

Full Time

JOB DESCRIPTION

- Develop and update the global homologation requirements for design team.
- Participate in design reviews and design release approvals to assure program design is on track to meet Global Certification requirements.
- Create and maintain timing plans for specific Certification activities, such as FMVSS.
- Develop test programs required to achieve type approval for new vehicles and all Global Certification and related markets.
- Plan, monitor and expedite tests, documentation and certification reports.
- Work with internal Indi-EV personnel, third party labs, consultants and regulatory bodies to drive US and Global Certification approval activities on planned schedules.
- Manage third party agents in various countries as needed to work with regulatory bodies on behalf of Indi-EV.

JOB REQUIREMENTS

- BSEE/BSME or other related engineering degree.
- A minimum of 5 years of automotive homologation experience with at least 2 years in a direct Global Certification activity related role.
- Experiences with FMVSS, ECE (EEC) and GB.
- Excellent oral, written and presentation communication skills.
- Ability and willingness to travel domestically and globally as required to support homologation activities.

WORKING AT INDI EV

Other than offering an endless supply of snacks and coffee, we provide our people with full medical, dental, and vision benefits. Work/life balance is also key, so we offer solid paid vacation time, and a compensated week off between Christmas and New Year's. All jobs are located onsite at our headquarters in Los Angeles.
