

## INDIEV All-Electric Crossover: Exclusive Driving Footage of the INDI One in Beverly Hills, Updated Specifications Revealed

**August 18, 2022** - On August 18, INDIEV revealed exclusive new footage of the INDI One driving through Beverly Hills. The footage marks a pre-production milestone, driving down historic Rodeo Drive just blocks from INDIEV's first Brand Experience Center. Media members, local government and green energy leaders, and Los Angeles influencers were given test rides in the INDI One, the first time that test rides of the INDI One have been publicly available on the west coast.

"It was a smooth quiet ride in the INDI One, but the kicker is being able to game on a full-blown PC with VR" DaPoets, Tech influencer

"I'm so excited to be a part of the edge of the future here at INDI" -Stephanie Heiner, INDI Innovator

"It really put the future of technology into perspective for me" -Alliestrasza, streamer & influencer

"The INDI One is the car for live streamers!" -Nezst, Twitch streamer

Alongside the new footage, updated specifications for the Standard and Premium Trim packages were unveiled:

### **About INDIEV**

INDIEV was founded in 2017 on the idea that the future of personal mobility will no longer be defined solely by horsepower or top speed, but rather from the connectivity, customizability, and processing power offered to drivers and passengers. Currently, the gap between the level of computing power available to individuals on their phones and at home compared to their personal vehicles is astronomical.

To this end, INDIEV invented the VIC - the Vehicle Integrated Computer. The Vehicle Integrated Computer, an incredibly powerful personal computer, gives users access to the same entertainment, productivity, and even Web3.0 access their home computing systems give them. By bringing the Internet of Things to personal vehicles, INDIEV want to help consumers broadcast their most authentic, individual self to the world around them, while providing an aesthetic, high-performance ride.

Based out of Downtown Los Angeles, INDIEV employs the most talented individuals from around the world across industries, demographics, and backgrounds. INDIEV looks to the future to inspire a new way of developing personal vehicles, all based out of the United States.

At INDIEV, We Do Cars, and You Do You.
